From Library Journal

Opening most appropriately with a foreword by Jane Goodall, this unique work offers about 170 essays by well-known names in the animal industry who represent many fields, among them psychology, philosophy, biology, ethology, sociology, anthropology, history, education, and law. The result is a welcome multidisciplinary approach that shows us the extensive roles nonhuman animals play in virtually all areas of our lives. The essays are well reasoned and often extensive; "Animal Cognition," for example, is followed by five additional essays, all penned by different contributors, with such titles as "Intelligence" and "Consciousness and Thinking." A chronology of historical events related to animal rights and animal welfare is included, as is an appendix that lists resources on animal welfare and humane education. This monumental work deserves a place in every reference collection.?Peggie Partello, Keene State Coll. Lib., NH

From Booklist

Although this volume is not encyclopedic, as in covering all facets of animal welfare, it does have good descriptions of the animal rights movement, especially its impact on some types of medical research.

Entries were chosen "by going through numerous books and essays and listing the topics that were covered in these works." Examples include animal boredom, genetic engineering, Humane Slaughter Act, hunting, and rodeos. Some longer discussions, such as animal cognition, are divided into several subsections with different contributors. There are numerous short biographies of persons whose work influenced the animal rights movement, such as Charles Darwin and Leo Tolstoy; only deceased persons are covered. For the most part, the contributors have been careful to present differing viewpoints. Most entries have a short selective bibliography. There is a chronology at the beginning of the volume and a list of resources following the A-Z entries. These resources include an annotated directory of organizations involved in animal welfare and humane education, as well as print source material. The volume concludes with an index and a list of contributors.

A number of these contributors are professors of philosophy, and many of the entries are steeped in philosophical argument and explanation that, while important to understanding one or more views of the animal rights movement, also put up barriers to popular consideration. In addition to discussions of animal shelters, mice as laboratory animals, vegetarianism, and zoos, there are entries for deep ethology, painism, sentientism, and virtue ethics. The language and the level of discussion make the book more appropriate for academic libraries than for school and public libraries.

ENCYCLOPEDIA OF ANIMAL RIGHTS AND ANIMAL WELFARE BY MARC BEKOFF PDF

From the use of animals in experiments to develop medicine for people to the preservation of endangered species in zoos, human beings' responsibility to and for their fellow animals has become an increasingly controversial subject. This book, which Jane Goodall in her foreword calls unique, informative, and exciting, provides a provocative overview of the many different perspectives on the issues of animal rights and animal welfare in an easy-to-use encyclopedic format. Students, teachers, and interested readers can explore the ideas of well-known philosophers, biologists, and psychologists in this field, such as Peter Singer, Tom Regan, and over 125 others, all of whom have contributed original entries.

Bekoff has provided a wide variety of well-chosen entries, defining terms and concepts and providing brief biographies, all of which relate to the topics of animal rights and animal welfare from the perspectives of many different disciplines: philosophy, psychology, ethology, anthropology, ecology, sociology, education, law, history, politics, theology, veterinary science, and public administration. The multidisciplinary approach allows users to critically examine the varied angles and arguments and gain a better understanding of the history and development of animal rights and animal protectionist movements worldwide.
