## **PDF**

An amusing and politically incorrect look at aviation on the Dark Continent.

Charter flying for the Safari industry sees some very interesting people and not all of them act rationally. From time to time there is some strange behavior, some of it funny and some of it definitely not!

This text encompasses 150 short stories with everything from racism to nothing short of clinical stupidity. Little moments I am sure some people pray would be lost or forgotten - alas here they are.

As I wrote this I started to believe it to be more of an amateur study in behavioral thinking or maybe a lack of thinking would be a more apt description. Some of the stories have some strong language much of which formed part of the moment.

Funny, sad, ludicrous, or moronic, just remember these were very real interactions. Enjoy.

Hilarious

By Amazon Customer

Jack has an unique way of finding humour through the disbelief, immense frustration, or utter confusion that the day to day life of a bush pilot can bring.

Reading this brought back memories of old friends (and not-so-friends) and perfectly describes the mindset of a Maun pilot, it's not glamorous, it's not always easy, but the real sense of being in it together.

If you're after a over hyped adventure book full of ray bans and bravado this might not be for you.

There's no better way of getting an insight into life in the Delta from one of Maun's well known characters.

Flying Asses

By Walter Waldeck

Thanks for the book Jack. Had a good laugh. As an ex-charter/bush pilot myself, I experienced many similar

characters and situations.

Now as a flight school owner I suspect there are a few of my ex-students in these pages. Fortunately I can't take the blame.

Glad to hear you've got another book in progress.

Pompous pilot tales

By Nedieh Red Nav

Interesting tales and some really funny ones like the Russians doing a CAT II ILS. Author is typically opinionated (pilot A-type personality) who constantly tells you he is OK with what ever but then still passes judgement on it.

Worth a read if you in the bush pilot game, not so much if you just an outsider to aviation.
