A fresh & important contribution to the growing field of multicultural counseling!

By tahtah2001

In honor of the book & its philosophy, I would like to briefly disclose who I am before writing my review.

I am an Asian-American male, bilingual family therapist, looking for new information about multicultural counseling to help develop my counseling theories. Also, I am working on a research paper on multicultural counseling through a Social Constructionist lens. I personally know Dr. Gerald Monk, the editor of this book, because I took some of his classes while in the MFT program at San Diego State University. I am writing this review while knowing that I am influenced by my personal experiences, my ethnicity, gender, professional career, and interest in social constructionism.

I highly recommends this book for those who are seeking a new and fresh perspective on tackling the challenges in counseling the culturally diverse.

I gave this book 5 stars because of the following reasons:

- 1) I really enjoy reading it. The book is well-written, has many short stories and exercises to practice and understanding the materials it presents.
- 2) It provides me with very important insight for my work, particularly a fresh look at "cultural competency" and the use of "discourse" in multicultural counseling.

3) It goes beyond the traditional ways of seeing and explaining culture, which I think are very practical for personal and professional understandings of "culture."

4) Finally, a book on postmodern approaches to multicultural counseling!

Great Book!

By Adonai23

This is the best book I read about multicultural counseling. It goes far beyond the narrow and essentialist thinking that underlies much of the literature in this field and elegantly translates postmodern ideas into practice.

Thought provoking and essential

By David Polniak

This book gives voice to the often covert workings of ethnic and cultural differences. It offers a view more realistic and complex than the "cookie cutter" ideas on how to work with clients from specific cultural backgrounds, and instead shows how there are often a competition of such discourses within each individual client. I'd recommend every counselor, educator, and caregiver read this book to better serve their clients. It brings to light what is so often invisible.
