The paperback version of the Hardcopy I grew up with ...

By David J. Willson

The paperback version of the Hardcopy I grew up with in my youth. Outdated in some ideas, obviously, but still very readable and a memory jerker for me. Thank you very much, well worth the money!

A Classic in Science and Math

By Harold A. Geller

This is not only a popular science classic written by one of the originators of the Big Bang theory (not called that by Gamow), it was the book that got me interested in science and my brother interested in mathematics. Great to get the same 'pocket' version that we had, in lieu of re-printed edition.

1, 2, 3, infinity

By C.H. Lowry

Great Book. This book introduced me to scientific thinking and the wonders of it all. Still interesting after all these years.
