This is sheer brilliance, printed. Just add crayons.

By Andrew

OMG! I've scribbled away on every sheet of paper that I've ever had in front of me. No pen, pencil or crayon has ever survived in my immediate vicinity. And this book NOURISHES the desire to color and doodle!. Oh, I really wish I could rewind the clock decades to when I had a single digit age, to a lazy, sunny day with

nothing better to do, a coffee can full of pencils and a sharpener and all the blue freezie-pops I could eat, and this amazing coloring book in front of me. This is sheer genius, printed and shared with the world. Inspired. Brilliant. Genius. Seriously, this is something to be treasured. Thank you, Souris, for this amazing book. It's gonna get destroyed. And then I'll get another and another, for all the kids on my xmas list.

It looks like EXACTLY what I like to doodle and observe

By Braxton Simpson

I'm a 16 year old with a very artistic and creative mind and I went searching for a coloring book to not only color, but to provide me with inspiration for my own artwork. The cover for this book is what grabbed my attention. It looks like EXACTLY what I like to doodle and observe. The sample of this book on Amazon only had a few pictures to judge, but the reviews promised a book full of beautiful artwork to improve upon with color.

When I got the book, I excitedly opened it up and soaked in all the beautiful artwork.

Now some of the art in this book is too good to color than I tore it out and hung it on my wall, while some other pieces are too complicated to color without fine tip art products. And of course, if you've read other reviews, there are two pages of just black ink. But the rest of the book is perfect for coloring and really lets you add your own touch to other artist's work.

The book is amazing and creative and a very good idea, if there was ever another collection of works like these I would buy the book in a heartbeat.

A treasure of contemporary art!

By Graham Stewart

I originally bought this book for my nine year old daughter but after looking at it I think I am going to keep it for myself. I am not an expert on the contemporary art 'scene' (I am not as hip as I once thought I was) but this book is a great primer for what is happening right now in art. The diversity of the works in this book are amazing! Pieces from graphic designers, cartoonists, street artists, and illustrators are included. I especially like the way that the author left the back side of the works blank except for the authors name and web page. That has been a coloring book pet peeve of mine ever since I was a kid. I have taken the time to explore some of the artists through their web pages and I am astounded at two things. First, I love seeing the artist's work the way that THEY decided to color it and I love learning more about each artist and seeing other examples of their work.

I teach middle school and I am going to have an opportunity to use this book in a few ways. I teach an elective to 7th and 8th graders, it is basically art for people who aren't artists. This book will be a tremendous resource for me to plan a unit on what is happening in art right now. Also, have you ever given a 7th grader crayons and just let them color? I never have but I am eager to give my students examples of contemporary art from this book to color as I teach them about specific artists or styles. What a great learning tool for me AND the students.

Looks like I am gong to be buying a few of these books for my students. Can I get a bulk discount? :-)
