Reading in a Second Language, Moving from Theory to Practice

By Ismary

This book is an impressive display of scholarship. It is well-organised and very readable. Any teacher who is interested in improving his/her understanding of how second language learners learn (or do not learn) to read should read this book. Any teacher who is interested in helping students improve their reading skills should get this book. Very well done.

A must

By Elvin Ortiz

This book is comprehensive and it is a must read for anyone who wants to find out what's going on in current research and practice in comprehension issues as it relates in first and second language. The text defines the literacy concept, discusses the research on this area, and also discusses the implications that this research has on comprehension instruction. I have been very satisfied with this book. I highly recommend it.

Very Thorough & Comprehensive Collection of L2 Reading Research

By Wooyoung Park

If you want to have a glance at what's going on in the field of L2 reading research, I strongly recommend this book. The author is, as I heard through my PhD adviser, quite well-known and recognized for his achievement in L2 reading & writing areas. And I think I could feel that what I heard was true when I read the first two chapters. At the end of every chapter, he gives some kind of pedagogic implications for teaching practitioners to get some tips that can be applied in the pertinent field. This is my favorite!
